The goal of the app:

GoldPath.com is made for CCI students who are looking to find jobs that match the skills that they have developed from courses they have taken as well as from prior work experience. This job-finding tool helps students find companies that align with their interests and allows them to see what competencies they might be missing from specific job positions. Students will be able to use the tool to develop an excellent resume, apply to jobs that they have the skills for, and look ahead to see what skills they still need to develop for a job position they are interested in applying to in the future.

**The team generated feature list:**

- Login & Signup
    - Login Form
    - Sign Up Form (Notifications/Updates)
- Profile Page
    - Update Personal Information
    - Update Password
    - Set Profile Picture
    - Set Profile Visibility

  - ○ Users can apply for jobs recommended by recruiters
- ● Additional Resources
  - ○ Links to helpful websites such as https://compass.charlotte.edu/ that help build skills.

Your 3 solution sketches:

1. Resume Builder

  - Crazy 8

- Solution Sketch

| Feature Description	Final Interface Sketch	Notes
The Resume Builder page is where users will go to find templates and advice on how to better their resume. They should be able to search for resumes styles that match the positions they are applying for and/or use their existing resume and edit it. They also need to fill out forms asking about the courses they have taken, work experience, etc.		- Forms to be filled out are numbered with a short description and button that directs them to the form. - The upload section specifies which file formats can be uploaded. - The templates should be visible and can be scrolled through using the arrows on the side and clicking on the template allows the user to edit and save it as their own.

2. Application Center

- Crazy 8

- Solution Sketch

Feature Description	Final Interface Sketch	Notes
The Application Center is where the user can see the matched job positions based on their skills. They can search for specific job titles with keywords, filter by specifications such as location, and bookmark job listings they want to look at later. They can apply to jobs on this page.		- The filters have dropdowns that have options that can be selected. - The left side of the page shows smaller summary versions of the job listings. - Hovering over or clicking the positions on the left side will open up the listing in a full view on the right side.

3. Additional Resources

- Crazy 8

- Solution Sketch

Feature Description	Final Interface Sketch	Notes
The Additional Resources page is where users can go to find useful links that will help them be more informed and help them build more skills. They can find a topic they want more information about and find links to other websites that can help them.		- There will be an image at the top of the page. - The buttons in the middle lead to specific links based on topics such as soft skills. - The links to the resources will be accessed by clicking the boxes at the end of the page. - Each link box will have an image that relates to the topic and a short description of the resource.
